

We'd like you to meet

George Grant

DDS PhD

Trying to keep up with Dr. Grant is tough. About the only time he slows down is when he's fishing. He began his dental education at the University of Texas Health Science Center at San Antonio and earned his Doctor of Dental Surgery degree. After nine years of practicing dentistry, Dr. Grant received the NIH Dental Scientist Award. He returned to the university to pursue a PhD in molecular biology and to complete his Oral Surgery residency. He joined our practice in 1998, bringing with him a wealth of experience. When asked why he chose AOMSA, his reply was simple. He liked the group's philosophy: A universal orientation to quality care. When asked why he likes fishing, he just smiled. You'll find Dr. Grant at our South Austin and San Marcos locations.
